

**Warning:** Please read directions completely before starting. If you have any questions please contact BMPP before beginning your installation. Also please check our website ([bigmikesperformanceparts.com](http://bigmikesperformanceparts.com)) for any updates or changes. Thank You.

**Parts Included:** License Plate mounting bracket Assembly. Includes Base Plate and License Plate Holder.

License Plate mounting Screws: (2) 6mm X 16mm (Phillips head), (2) 6mm nuts with lock washers (10mm wrench size)

Base plate mounting screws: (2) 4.2mm X55mm screws (1) 6.3mmX20mm with washer (2) nylon 1" spacers.

**Tools Needed:** 7mm & 10mm sockets with ratchet Note: 1/4 inch drive preferred but 3/8 will work (but extra caution will be needed when tightening screws)

Phillips screwdriver & 10mm wrench

1/8 inch drill bit and drill.

**Step 1:** Insure all parts listed above are accounted for. Note: If at any time during the installation process you need assistance please call (831)663-4849.

**Step 2:** Separate the license plate holder from the base by simply pulling the pull pin ring outward and sliding apart.

**Step 3:** Remove the two center spoiler screws (4.2mm) using a 7mm socket and ratchet. See figure 1 for location.

**Step 4:** Now position the base mount with the two holes towards the front of the car, centered over the two holes where the two 4.2mm screws was just removed. Note: Tube will be facing down. Using the (2) 4.2mm X 55mm screws and the (2) 1" nylon spacers secure the base plate in place. See figure 2

**Step 5:** Once base plate is secured using the two front mounting holes, carefully drill one pilot hole for the rear mounting screw. See figure 3.

**Step 6:** Using the 6.3X20mm screw secure the rear of base plate to the vehicle using the following method. Caution: When tightening the screw extreme care should be taken not to over tighten screw or the hole may become stripped and lose its ability to secure the base

plate. Place the screw into the 10mm socket and begin to tighten. Once the screw is flush with the plate stop. Now Tighten screw one half turn and stop.

**Step 7:** Secure the license plate and frame (optional) to the license plate bracket using the two screws and nuts provided. Requires the Phillips screwdriver and 10mm wrench (Not included).

**Step 8:** Slide the license plate rods into the two tubes located on the base plate. Slide the rods into the tubes until the rods hit the pull pin. Simply pull the ring on the pull pin and advance the rods. Release ring and continue to advance rods until the pull pin locks into place. **NOTE: If the rods become difficult to insert into the tubes, spray with WD-40 or any other silicone type spray lube.** See figure 4. In some occasions the license plate may require a little adjustment to level. Simply pull pin and slide plate out approximately two inches, grab frame at arrows (See figure 5) and rotate. If plate is high on left or right side, rotate high side down slightly and release. Verify alignment and repeat as necessary. Once leveled plate will remain level.

Congratulations!! You have just installed the STO N SHO™ front license plate mounting system. Thank You for your purchase.

**Caution:** Bracket lowers ground clearance by approx 1/2 inch.

**Remove prior to entering automated car wash**

**Exercise care when entering or exiting steep driveways or damage will occur**

**Parking Stops or high curbs, stop well before or damage will occur**

**Remove prior to running on race track**

Medium skill level required. If unsure, have bracket installed by your local Dealer or Body shop.

Limited Lifetime Warranty (Transferable)

Big Mike's Performance Parts (BMPP) warrants to the original purchaser only that this product will be free of manufacturing defects in material and workmanship for the life of the product to the limitations and exclusions set forth below:

Return product to any authorized dealer. Contact BMPP for the dealer nearest you. Upon examination, BMPP or its representative will, at its sole option and expense, repair or replace any product found to be defective. If product to be replaced via mail, BMPP will return the repaired or replaced unit to you via its usual shipping method from the factory to your address in the United States of America or Canada only. Any shipping costs for addresses outside of the United States or Canada shall be the responsibility of the purchaser.
