

Driven Beyond Perfection

# DEAD PEDAL INSTALLATION INSTRUCTIONS

5R3Z-6112020-BL

APPLICATION: 2005 - 2008 Mustang

## TOOLS REQUIRED:

- 13mm Box Wrench
- Small Blade Screwdriver (if removing kick panel)

## INSTALLATION INSTRUCTIONS:

### Step 1:

Using care, gently lift up on drivers side door sill trim and remove it from the vehicle.

### Step 2:

With a small screwdriver, pry up plastic push pin and carefully remove drivers side kick panel - there will be several tabs holding panel in place. Remove from vehicle.

### Step 3:

Pull back carpet to expose 13mm bolt next to wiring harness. Loosen bolt enough to slip dead pedal bracket around wiring harness and under bolt head. It is not necessary to remove bolt.

### Step 4:

Slip carpeting under dead pedal assembly. Rotate assembly until it meets floor and tighten bolt until pedal is tight. (Figure 1)

### Step 5:

Reinstall kick panel and sill plate. (Figure 2)

**NOTE:** It is possible to install dead pedal without removing sill trim or kick panel if panel is pushed toward outside of vehicle while 13mm bolt is loosened and pedal assembly is installed. This requires good lighting and a degree of dexterity.

## SATISFACTION GUARANTEE:

If you are not happy with this product for any reason or found product to be defective in manufacturing, simply return it to Scott Drake Enterprises, Inc. within 30 days of purchase and we will replace it - no questions asked. We stand behind our products one hundred percent, so you can sit behind the wheel with pride.

*\* Please call Scott Drake Customer Service for a Return Authorization (RA) before returning any product. Proof of purchase and dated receipt must be present with any return. All returned products are tested and if found to be damaged by the installer, no replacement will be issued. You pay the cost to ship to us, we pay for the return shipping. Guarantee does not include any labor and/or tax charges incurred.*
