

1987-93 SVE LX

GRILLE BAR ELIMINATOR

Tools Required

- Plastic Cutting Saw
- Drill Motor
- 1/4" Drill Bit
- Eye Protection
- Masking Tape

Instructions

1. Near the grille area, apply a layer of masking tape to the bumper cover to protect surrounding paint.
2. Remove the factory grille bar by cutting with a body saw or other equivalent cutting tool suitable for cutting plastic parts.
3. Clearance the headlight reinforcement panel behind the grille opening for proper panel fitment.
4. Trial fit grille delete panel to the bumper cover making note of the areas.
5. Once desired fitment is obtained, use the delete panel to properly locate the position of the push pin hole location on the bumper cover. Remove the panel and use a 1/4" drill to drill the retainer holes.

Disclaimer

By using this instruction sheet, you agree that other than as expressly stated in the LMR Terms and Conditions (Agreement) or as required by the laws of the state of Texas or applicable United States federal law (Applicable Law), this instruction sheet is provided "AS IS" and LMR does not make any specific representations or warranties about this instruction sheet. For example, LMR does not make any warranties about: (a) the content provided in this instruction sheet; (b) any specific features of this instruction sheet, or its accuracy, reliability, or ability to meet your needs. The knowledge and experience level of users of this instruction sheet vary widely; if you do not have adequate knowledge and experience to use this instruction sheet and safely accomplish the tasks described, please hire a professional to assist you for your safety and the safety of your vehicle and others.

Limitation of Liability

Except as required by Applicable Law, LMR, its affiliates, officers, directors, employees and agents will not be responsible for any loss of profits, revenues, business opportunities, goodwill, or anticipated savings, indirect or consequential loss, punitive damages caused by:

- Errors, mistakes, or inaccuracies in this instruction sheet
- Personal injury or property damage resulting from your use of this instruction sheet

This limitation of liability provision applies to any claim regardless of whether the claim asserted is based on warranty, contract, tort or any other legal theory.

Use this information at your own risk. Any injury, damage, or loss that may result from use of the tools, equipment, products, or information contained in this instruction sheet is the sole responsibility of the user.

Indemnity

To the extent permitted by Applicable Law, you agree to defend, indemnify and hold harmless LMR, its Affiliates, officers, directors, employees, agents, information providers, licensors, and other partners from and against any and all claims, damages, obligations, losses, liabilities, costs or debt, and expenses (including but not limited to attorney's fees) arising from: (i) your use of and access to this instruction sheet; (ii) your violation of any term of the Agreement; (iii) your violation of any third party right, including without limitation any copyright, property, or privacy right; or (iv) any claim that your actions caused damage to LMR or a third party. The defense and indemnification obligations will survive this Agreement and your use of this instruction sheet.

6. Once panel is mocked up and desired fitment is confirmed, prep and paint the grille delete panel.

(A)

7. Once panel is prepped and painted, thoroughly clean the surface of the bumper cover where the double sided tape will adhere. Use a quality wax and grease remover or isopropyl alcohol to remove any traces of oil and grease from the mating surface. Once dried, apply the adhesive promoter

(A) to the mating surface and allow time to dry. Remove the protective strip of the tape to expose the adhesive. Line up the retainer holes using the supplied push pins (B) and firmly press the tape onto the bumper cover. Go over entire surface of tape strip to make sure proper bond is achieved.

(B)

ATTENTION:

LMR highly recommends the installation of this product by a qualified body shop. Failure to follow instructions can cause improper adhesion of double sided tape which can result in the potential loss of product from vehicle. Part must be installed in an environment that has a temperature of 70 degrees F or higher. Temperatures below 70 degrees F can result in insufficient adhesion characteristics.
