1979-04 MUSTANG SEAT TRACK EXTENSIONS

Prop. 65 Warning for California Residents
WARNING: This product may contain chemicals known to the State of California to cause cancer, birth defects, or other reproductive harm.

(Adds roughly 4.5 inches for hardtop owners and 3 inches for convertible owners. Due to this brackets design, you will sit up around a half inch taller than stock.)

1. Remove the seat from the vehicle, once the seat is out, do a dry fit on each bracket.

2. ***If needed*** On inner edge of the trans tunnel, the carpet and the jute backing causes a slight hump that interferes with the bracket sitting flush. Make a minor relief cut in the carpet. Remove a one by three inch section of the carpet, and pull a little of the jute backing out to make the bracket sit flush. *(You will not see the relief cut once the bracket is installed.)*

3. Line up the new bracket and use the supplied bolt for the rear first and nut on the front to install. Fully tighten these down and repeat this for the other bracket.

4. Once you have all the brackets in, reinstall the seat and stretch out for a much more comfortable ride.
