

Adjustable Exhaust Hanger XR

Get your exhaust hung perfectly! Aligning the exhaust on 1979-2004 Mustangs can be annoying, especially when mixing and matching aftermarket components. It seems like no matter what system you're installing, fiddling with everything never gets it perfect. Until now! The Mustang Geek Adjustable Exhaust Hanger XR allows you to adjust the length of the hanger from 1-1/8" to 3-1/8" so you can get the exhaust alignment perfect! Our "XR" (Extended Range) design offers a much wider adjustment range than the original Mustang Geek Adjustable Exhaust Hanger, but it's less compact. The Mustang Geek Adjustable Exhaust Hanger XR works on all 1979-2004 Mustangs (and bazillions of other cars). The Mustang Geek Adjustable Exhaust Hanger XR features laser-cut 304 stainless components, high temperature silicone grommets, and serrated locking hardware. No more shoving, stretching, or bending exhaust hangers!

- Allows precise alignment of exhaust components
- Offers 1.1" to 3.1" exhaust hanger length range (2" adjustment!)
- Laser-cut, 0.250" thick 304 stainless steel construction
- High-temperature silicone grommets
- Serrated locking hardware

Step 1

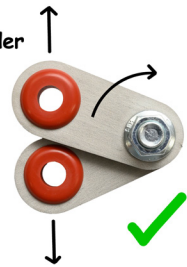

Use WD-40 or similar lubricant to ease installation. **Trust us, it works wonders!**

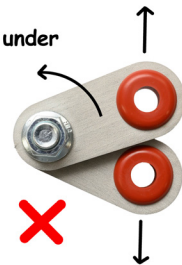

Step 2

Orient the overlapping halves of the exhaust hanger as shown so the tension of the exhaust pulls the bolt in a clockwise (tightening) direction.

GOOD:
Tightens under tension!

BAD:
Loosens under tension!

Step 3

Install the hanger and adjust to the desired length. Either tack weld the hanger at the seam or mark the hanger edges.

Step 4

Torque the bolt to 25 lb-ft. Note that if you didn't tack weld the hanger edges together, the halves will likely rotate when tightening, so pay attention and reorient before tightening.
