This RTR product is only intended to be installed on vehicles equipped with the RTR Splitter Kit. This product is not intended to be installed on vehicles equipped with the OEM GT front splitter or any other aftermarket version.

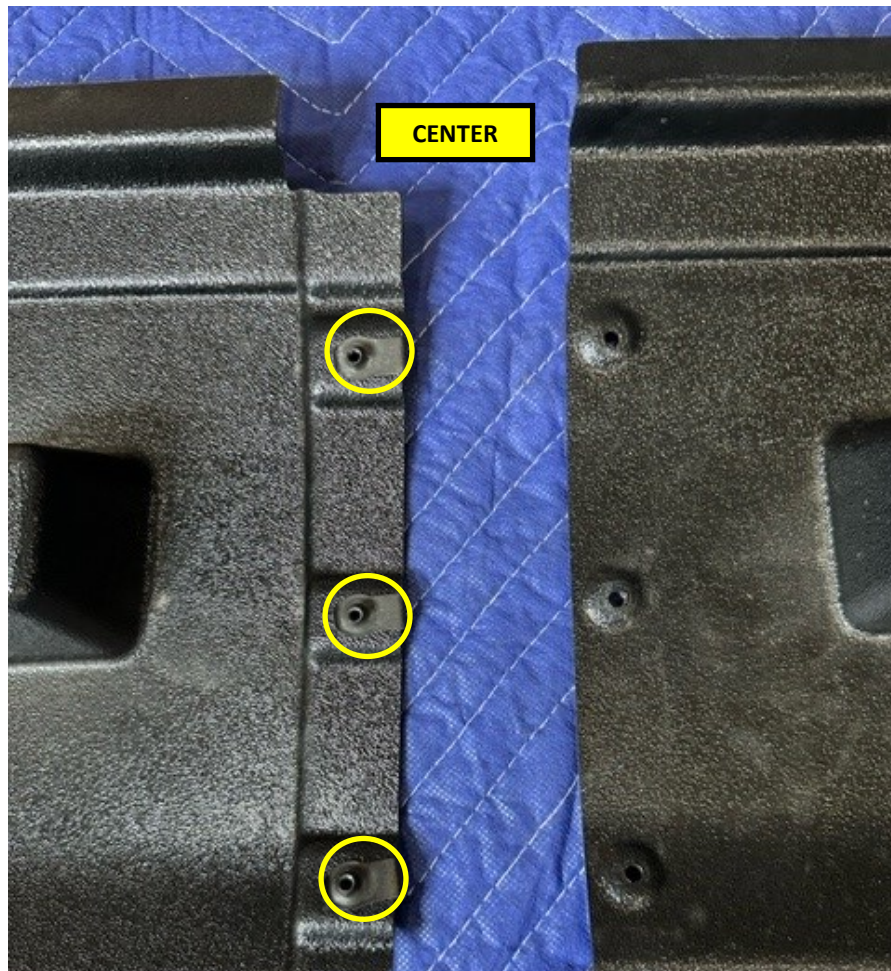

1. The bumper cover has 12 screws around the perimeter in the circled locations to be removed. Remove all with a 7mm socket and set aside for use in a later step.

PERIMETER OF BELLY PAN

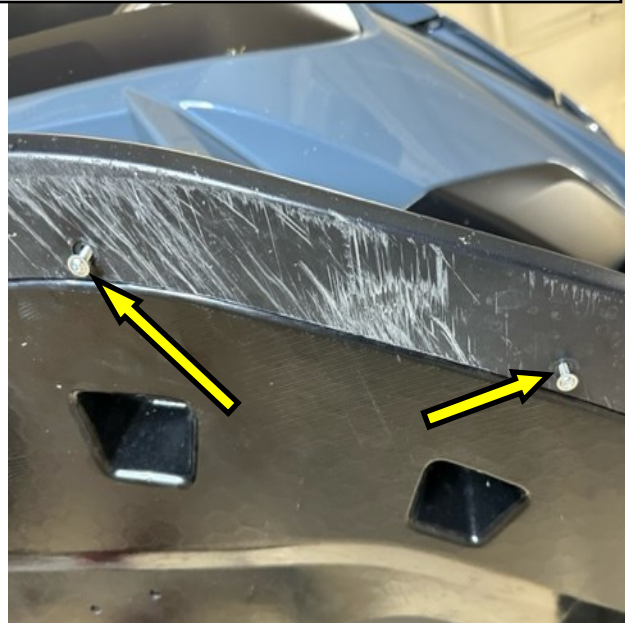

2. Install the supplied clip nuts (8) (drivers side shown and circled above) around the perimeter of the belly pan. There will also be 3 more on the drivers side of the belly pan down the center as shown below for a total of 11.

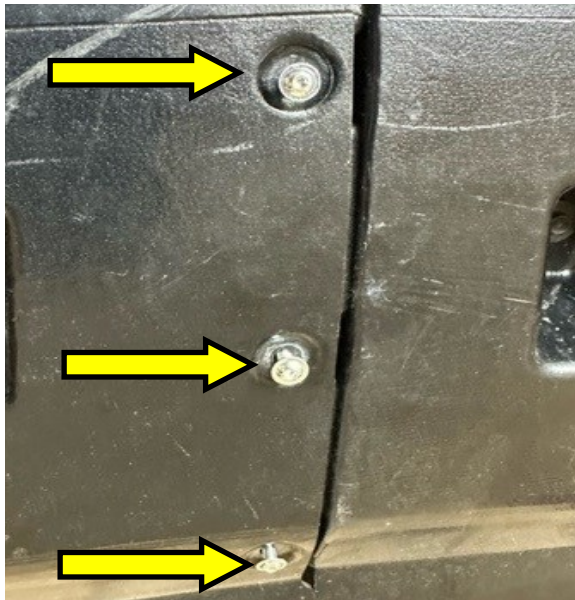

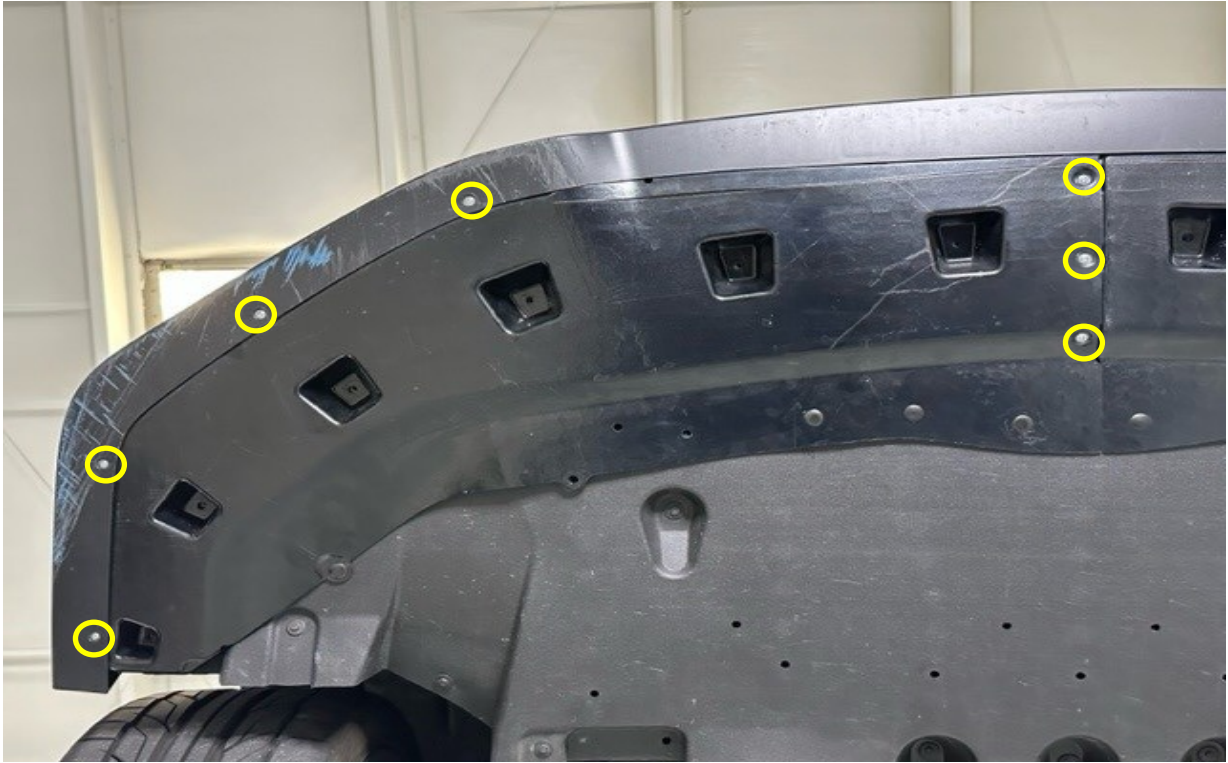

CENTER

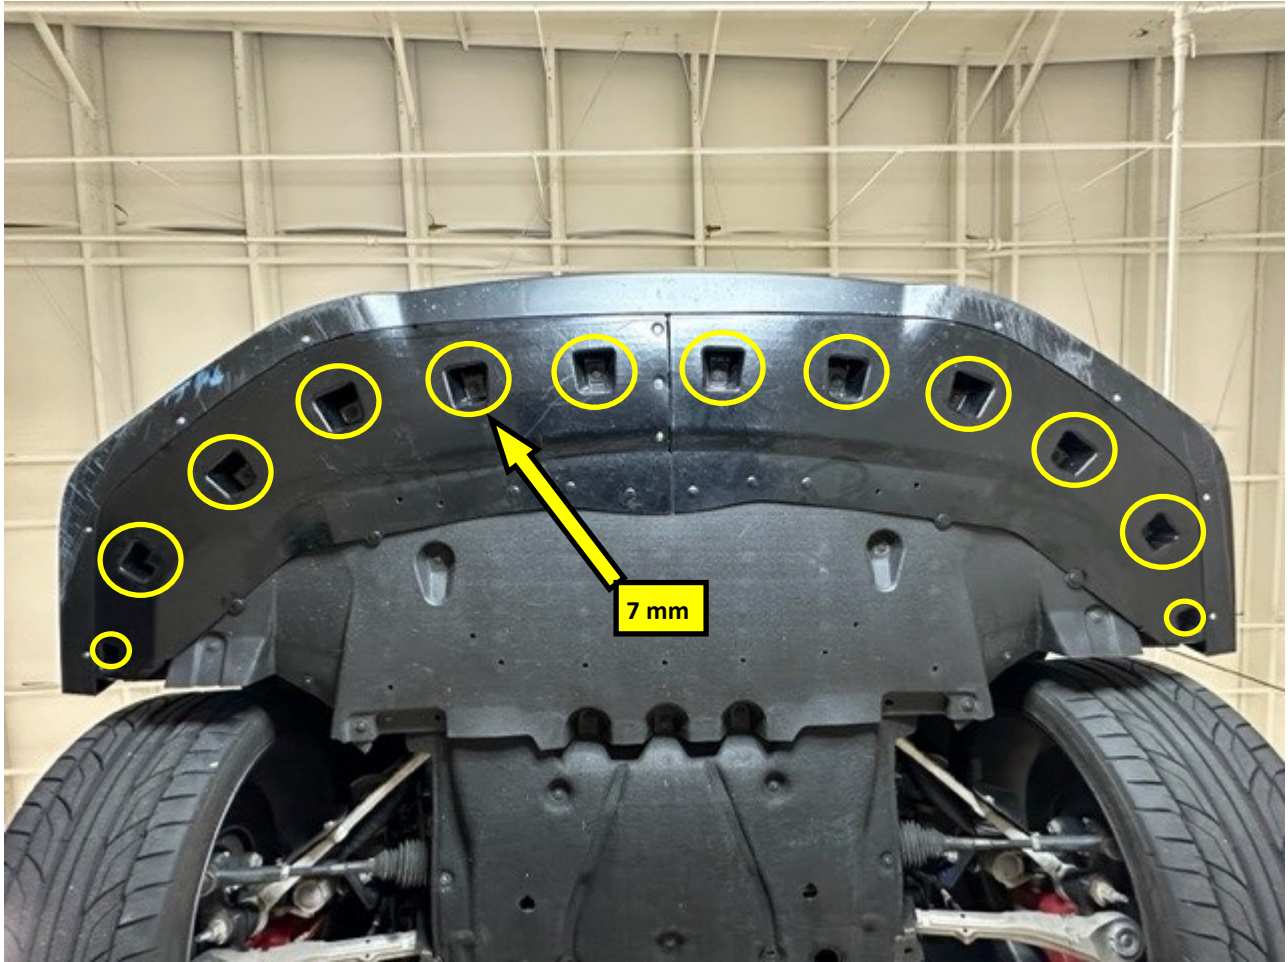

3. Install the drivers side belly pan, and ensure the leading edge is flush with the splitter. Install (4) 4x20 hex bolts (included in hardware bag) using a 2.5mm driver or wrench.

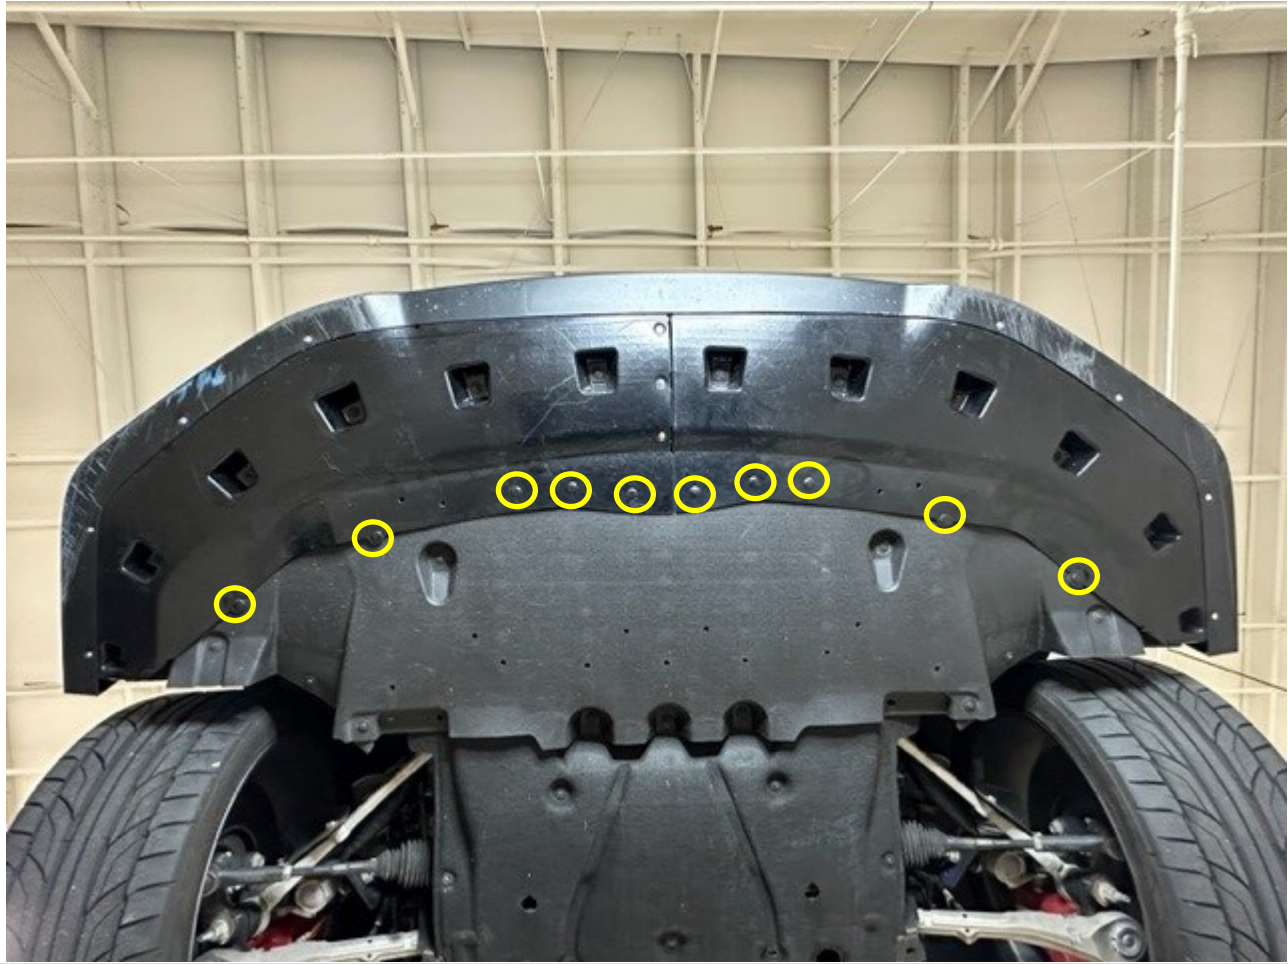

4. Install the passengers side belly pan, and ensure the leading edge is flush with the splitter. Install (7) 4x20 hex bolts (included in hardware bag) using a 2.5mm driver or wrench. There are 4 on the perimeter , and 3 in the center to join the halves together.

5. Locate the 12 screws that were removed in step 1, and install them in the locations shown above using a 7mm socket.

6. Locate the 10 Push Rivets that are included in the kit, and install them in the locations shown above. Push firmly to ensure they sit flush when installed.
