

RECARO SEATS—TRIM BEZEL LOOSE—BUILT ON OR BEFORE 5/9/2011

TSB 11-10-18

FORD:
2012 Mustang

ISSUE

Some 2012 Mustang Boss and GT500 vehicles equipped with Recaro front seats and built on or before 5/9/2011 may exhibit a concern with the driver and/or passenger side seat trim bezel warping or coming loose.

ACTION

Follow the Service Procedure steps to correct the condition.

SERVICE PROCEDURE

Replace the seat trim bezels in both the drivers and passenger seat with the new design bezels in the service kit. Follow the installation instructions included with the kit. Two (2) kits are required. Each kit services one seat.

NOTE: The information in Technical Service Bulletins is intended for use by trained, professional technicians with the knowledge, tools, and equipment to do the job properly and safely. It informs these technicians of conditions that may occur on some vehicles, or provides information that could assist in proper vehicle service. The procedures should not be performed by "do-it-yourselfers". Do not assume that a condition described affects your car or truck. Contact a Ford or Lincoln dealership to determine whether the Bulletin applies to your vehicle. Warranty Policy and Extended Service Plan documentation determine Warranty and/or Extended Service Plan coverage unless stated otherwise in the TSB article. The information in this Technical Service Bulletin (TSB) was current at the time of printing. Ford Motor Company reserves the right to supercede this information with updates. The most recent information is available through Ford Motor Company's on-line technical resources.
